Dickinson Family Library progress meter

2025-04-23

Increasing production

In June 2023, Houghton Library requested increased imaging production for the *Dickinson Family Library* project.

Through consultation, testing and evaluation, Houghton and Imaging Services revised the sorting criteria used to determine which books require specialized handling and photography from those well-matched to our standardized, higher-production, photography service. **The updated sorting criteria dramatically increased the proportion of books routed to the higher-throughput service.**

Per Christine Jacobson, 2024-06-27, an **estimated 160,277 page-images remained**.

Post-2024-06-27, **Imaging Services has completed 5 batches, with page-images totaling 23,024**–an **average 2,521 per month**.

Estimating remaining volumes and page-images, per CJ, 06/27/2024

- Studio (D40) designated titles: 15,124 page-images.
- Lab (D20) desginated titles: 47,713 page-images.
- D20- & D40-designated items that need to be treated: 97,440 page-images.
- To-be-designated items: 223,050 page-images
- Total number of images, estimated: 160277

At our current production rate

With **137,253 images remaining**, and our current **production rate of 2,521 per month**, our **projected project completion date is October 14, 2029**.

Targeting a date for completing the project

Alternatively, if we set a **goal of completing the project on June 30, 2026**, for example, our production rate would need to be **9,182 images per month**; and in practice, ensuring we complete the project on-time would require setting a more ambitious target, recognizing we will periodically fail to hit any mark we set.

In this scenario, **Imaging Services would recommend Houghton deliver 4000–5000 pages monthly to *D20*, in addition to any batches it delivers to *D40*, and that we reassess our progress in six-or-so months**.
